Project Design Phase-II
Technical Architecture:

Date	11 November 2022
Team ID	PNT2022TMID31632
Project Name	Project – Estimate Crop yield using Data analytics

TECHNICAL ARCHITECTURE:

- **The data is fetched from the user and data is analyzed, pre-processed, visualized, explored, etc and the data report has also been created.**
- **Using IBM Cognos, the Data visual are been generated according to the data report which we have created using the user data.**
- **Thus, it can create huge change in field, crop yield estimation thus resulting profit to the farmer.**
